

DATA SHEET

Target retriever next-generation wireless

Double target retriever with 360° rotation, controlled entirely wirelessly. It brings the target forward, back and round at a distance, with nobody on the firing line, for safer and smoother training.

Specifications

Control	100% wireless, from a router, PC, tablet or dedicated antenna. Multi-lane management.
Rotation	360° rotation for tactical training.
Vision	Onboard camera with video feed to a tablet.
Lighting	Built-in RGBW lighting.
Battery life	6 to 8 hours, with automatic recharging.
Installation	On a steel rail in indoor ranges, installed by our teams on site, including installation under concrete slabs.
Rail	Steel T-rail, 50 x 50 mm, 6 mm thick.
Related range	Indoor rail-mounted retrievers, outdoor retrievers on galvanised steel cable, rotating targets, automation and accessories.

Applications

- Sport shooting clubs, law enforcement, government agencies, local authorities and training centres.
- New-build or renovated indoor shooting ranges.

Non-contractual document. Specifications subject to change. Quote on request.
